VOLUME XVII, No. 6

EMPRESS, ALTA. THURSDAY, July 18, 1929

Price: \$2.00 Per Year.

United Church

The Church School, 10.30 a.m.
Public Worship, 11.30 a.m.
Thurs. of Sermon:
"The righteous shall flourish like the palm tree." Ps. 92
Wainfleet, 1.45 p.m.
Leland, 3.30 p.m.
Social Plains, 7.30 p.m.
It is generally in summer that religion is snowed under. Therefore keep your heart warm and alive by spiritual fires by, coming to church.
Rev. Geo. A. Shields, Minister.

Softball

The Mayfield Flatfoot, headed by the redoubtable warrior, Walzey Leach, invaded Empire on Monday night and engaged the Empire tribe of Never Sweats in a sizzling game of softball. The invading Flatfoot were turned back by a score of 5.3. But much powder was expended as a result of the conflict and Walzey Leach has hurled his deli to the Flatfoot and challenged them to battle on softball on the Flatfoot grounds at Mayfield next Wednesday afternoon. Incidentally a horseshoe tournament and dance was mentioned.

Canada's newspaper production in 1927 was 2,082,830 tons, leading the world. This was 600,000 tons more than the United States, and an increase of ten per cent for the year. The value was \$132,380,720.
Miss K. Orend, is visiting at Schuler.

Notice

The Summer Reunion of the O. S. A. Alumni Association is to be held at the Olds School of Agriculture, on Thursday and Friday, July 18 and 19. The Summer Reunion is one of the many pleasant and enjoyable occasions that take place at the O. S. A. each year.

The programme for the forthcoming Reunion includes the unveiling of Honor Roll bearing the names of ninety some O. S. A. graduates who served in the World War. This function is to take place on the first day of the Reunion at 2.30 p.m. The other items on the programme will include picnic suppers on the lawn during both evenings, playing of games, business meeting of the Alumni Association and a survey of the experimental plots and the inspection of the plots and flower.

The Alumni members and their friends are all invited to attend on one or both of the days of the Reunion. It is felt that the time and the money spent in taking in this fun will be well worth while.

Cream Prices

Paid at Creameries

For the week ending June 29, 1929, the following prices were reported paid by creameries per pound of butterfat, in the several grades of cream, and at the points shown:

	Special No. 1	No. 2	Grade
Bonnyville	35c.	34c.	33c.
Strathmore	34c.	33c.	32c.
Other Points	33c.	32c.	30c. 25c.

Mrs. E. S. Weston left on Thursday last week on a trip to Calgary, returning Monday, accompanied by her niece, Miss Norma Weston, who will visit with her awhile.

Mrs. S. G. Clarkson and Mr. and Mrs. H. Westcott and children, left on Sunday on a car trip to Kindersley; Mrs. Clarkson will visit there for a few weeks.

Three Persons Lose Their Lives in Bathing Fatality at Buffalo, Alta.

A sad fatality taking toll of three lives, occurred at Buffalo, on Sunday, July 14. Mr. and Mrs. Zeppershahn and niece, of Hamanuk, Alta., were the victims. They had been attending a Ukrainian Church service, some twenty-four miles north, and had motored down to visit with Mr. and Mrs. S. Kulick. Eight persons were in the bathing party. Two bodies were recovered on Sunday evening and one on Monday morning. The remains were taken to Yungtown for interment.

Heavy Storm North of Town

A heavy storm visited the district north of town on Sunday. Close to town there was very little rain, but about five or six miles north it was real heavy. Hailstones of a large size fell in the district near Outburt and is reported to have travelled further east and done damage in the Leader and Prelate districts. About an hour previous to the rain falling, a prairie fire was started by a lightning flash.

Quiet Roads

When I set out on life's uncertain way
Give me the winding road and let me stray
From custom-beaten paths to woods where hide
The trails which wander up the mountainside
Some little trail which seems
Indifferent to
The feet that tread its rocky pathway through
Years past, that rambles for the sheer delight
Of sealing some forbidden mountain height.
So lonely and yet, like the silent friend,
Who, craving love, rewards you in the end;
For quiet rhythms and quiet roads will bring
You always to some lovely lonely little thing.
A soul of hidden beauty it may be
Or fleeting glimpse into eternal life.
(—Lou Ella Archer in New York Times)

John Barrymore in "Tempest" will be shown at the Empress Theatre, next week. It's a "Paced" Picture.

Miss Gillies, of Irvine, Alta. is visiting her sister here.

Care of Shade Trees

The care of shade trees is important if their usefulness and beautification to the grounds is to be obtained to the fullest extent.

With evergreens, the trees should be watered when they are planted. Where the season is very dry it may be necessary to water the second and even the third year after setting out, in order to prevent losing them. The young trees should be shaded the first year. This may be done with large shingles. The weeds should be kept in check, the land around the trees mulched. Practically no pruning is required for evergreens except where two leads start, in which case the less desirable one should be cut off.

In the case of deciduous trees, the treatment is somewhat different. The majority of shade trees grown on the prairies are grown from seed except poplars and willows which may be started from cuttings. No difficulty has ever been experienced in starting deciduous trees at the Dominion Experimental Station at Scott. Although this class of trees is not watered at the Scott Station, there is no objection to using water at the time of planting if the land is very dry. The trees may also be watered once or twice during the summer if there is any danger of losing them from drought. Weeds should be kept down and the land cultivated around the trees until they are large enough to shade the ground. In order to train the tree properly, pruning should begin the second year after planting. The lower branches should be cut off to a height of from 2 to 2 1/2 feet above the ground. This height will depend upon the growth of the tree. Only the main stem should be left. Pruning should be done in late fall or early winter when the tree is dormant. The part where the branch is removed from the tree should be painted to help prevent decay. If the trees are properly pruned in the early years of growth, very little is necessary later, except removing dead growths and thinning out.

Every grower should go over his trees several times during the year and make a careful search for disease and insects. When disease is found, part of the diseased branch or twig should be sent to the Provincial University or nearest Experimental Station. In the case of insects, they may be mailed in a small bottle. Lit.

Forks School Report No. 3506

(Report for term ending, June 1929)

Promoted from Grade VII, and VIII, Marjorie Demorest. Promoted from Grade VI, to VII, Violet Hicknell. Promoted from Grade IV, to V, Dorothy Brown and George Muza. Promoted from Grade III, to IV, Marjorie Brown and Elsie Spaepen. Promoted from Grade II, to III, Marjorie Demorest and Elsie Mack. Promoted from Grade I, to II, Ronald World, Jack Muza, Marie Louise Spaepen, Douglas Barnes, Donald McNeill, Audrey Murdoch.

Every grower should go over his trees several times during the year and make a careful search for disease and insects. When disease is found, part of the diseased branch or twig should be sent to the Provincial University or nearest Experimental Station. In the case of insects, they may be mailed in a small bottle. Lit.

Mr. and Mrs. J. Muza and family, left on a trip to Elkwater Lake on Tuesday.

Anglican Services

St Mary's Anglican Church, Empress.

E. A. Torrance, Incumbent. July 21st, Trinity VIII. 3 p.m., Sunday School. Choir practice Thursday, 8 p.m.

Portreave 9.30 Holy Communion. Wynote School 11.30 Holy Communion.

Prelate 7.30 p.m., Evensong and Sermon. The Rev. H. J. Hancox, of Cahri, will conduct the services.

A number of the boys from the Leland district, attended the Rotary Club boys' camp at Elkwater Lake.

Mr. and Mrs. Herb McCune who returned here on Thursday with their children; left again on Friday, on a car trip to the States. They took one child with them, leaving the others here with relatives.

W. H. Brodie left by car on Monday for Calgary. Joe Cosnar, left for the Peace River District.

Brot Albanach

1. Pretty little Katie Kemp dancing the highland fling at the Highland festival.

Brot Albanach appeared on the menu of the "Traill Neolin" Banquet last night. The Banquet was a most successful one, and if any of those who attended the Highland Gathering and Scottish Music Festival at Banff last year could read that far, they knew that "Brot Albanach" was nothing more than a name for a Scotch dance. The Highland Gathering was a great success last year. This year, between August 31 and September 2, it will be repeated. Banff will be Scotland for a week. Pipes will shriek through the forests and hills; the fiddlers will cut the trail; and there will be the dancing, highland dancing, and

dance contests—and Caledonia games, tossing the caber, and putting the shot. And in the evening, music—Scottish music—with famous singers as interpreters. For the first time in Caledonia, for the first time in nearly a hundred years anywhere, the Royal Highness the Prince of Wales will be heard among the hills, and the pipes will play the minister to his palpit.

Paintings and Panegyric—His Royal Highness the Prince of Wales has once more graciously given his patronage to the Banff Highland gathering.

Apply the Same Principle

During recent years there has been a decidedly better understanding between the east and the west of Canada, and between the Maritime Provinces and the rest of the Dominion, based on closer acquaintance and knowledge of the life and the people in each of the major sections of this far-flung country. There is today far less of sectionalism, prejudice and misunderstanding than in any previous period of Canada's history, and happily, this spirit of goodwill and co-operation is growing more and more pronounced.

Anything and everything that will tend to promote this wider knowledge and better understanding should be done and encouraged. We believe goodwill and understanding can only be brought about and maintained by frankness, and the dissemination of knowledge. That is, each people must be made and kept acquainted with actual facts about the west and informed as to the views, opinions and ambitions of the west, and, vice versa, western people must be informed in like manner about the east. And it is particularly the duty of the newspapers of the Dominion to discharge this patriotic duty.

It is in the performance of that duty we would draw attention to a recent editorial appearing in "The Financial Times." Much of that article no exception can be taken, but the whole difficulty is that it is based upon an entirely wrong conception, which fact is made abundantly evident in the concluding sentence of the article, as follows: "The important consideration is to protect the buyer, which will at the same time be a safeguard on the dependable reputation of Canadian wheat in all markets."

This may be the eastern viewpoint, but we submit the western viewpoint, and that is that the word "producer" should be substituted for the "buyer" in the sentence quoted.

The person entitled to receive first consideration in matters affecting the growing, raising, marketing, or consumption of wheat is the grower, the wheat, not the man who buys it, or transports it, or sells it into flour. The status of Canadian wheat in the markets of the world must remain unimpaired at a high standard, not so much for the benefit of and protection of the British or foreign buyer, but in the interests of and to protect the Canadian farmer who grows the wheat in order that he may obtain full value for his product and ample reward for his labor.

Substituting the western viewpoint for the benefit of eastern people, it may well be asked of "The Financial Times," and other exponents of its dictum that in matters affecting the grain trade of Canada the important consideration is "to protect the buyer," whether it, and they, are equally prepared to accept the principle that, in all matters affecting, say the customs tariff, the important consideration is to protect, not the manufacturer of the financier who has invested in manufacturing industry, but the great mass of consumers of Canada, the people who "buy" the products of these factories?

If it is the "buyer" of the products of the farm who are deserving of first consideration, and who above all should be protected, then pure logic must force acceptance of the principle that it is the "buyer" of the products of the factories who must likewise be given first consideration, and their interests recognized and protected first and foremost in all matters of tariff or other legislation affecting such industry.

In other words, according to the eastern view, as they would apply it to the farmer, it is not the industry that should be protected, or those who have made investments in industry and labor in it, but the buyers of the products created by such industry. The truth is, however, that when these same interests advance tariff and other arguments in their own behalf they directly reverse the principle, and resolutely contend that it is the producing manufacturers who must receive first consideration and be accorded protection, rather than the buyers, i.e. the consuming masses of the Dominion.

Good understanding and complete national co-operation between east and west cannot be built up in this way. It is impossible to apply one principle toward western agricultural industry and an opposing principle to eastern manufacturing industry. The same principle must be applied both east and west.

Discover Radium Mines

Find in England Has Already Yielded \$50,000 Worth

Radium mines are not discovered every day, but some meteorologists, while exploring a lead near Matlock, England, had their candle lights extinguished by had a terrific explosion. They saw ahead of them a dimly lighted cave, and a sample of earth taken from the cave was sent to Miss. Curie, who declared it to contain radium. The mine and estate was then bought for \$450,000. Further exploration, it is stated, has resulted in the discovery of another radio active mine, which is now to be exploited. The estimated value of the radium already found is \$5,000.

Half of the world's supply of aluminum comes from Arkansas. Aluminum is never found in its metallic state, but is always combined with bauxite, granite, feldspar, mica, etc.

Declares Allies Fear

Of Germany Absurd

Only Nation Without Arms Says Minister Of Defence

Dr. Wilhelm Groener, minister of defence, in a speech reviewing Germany's military policy charged that the states victorious in the world war have done nothing along disarmament lines and endeavored to show that it was absurd for the allies to claim they were not of being attacked by Germany.

Speaking of present military forces, he said: "France has, on European soil, 27 divisions; Belgium six; Poland 20, and Czechoslovakia 26 brigades, a total of 76 divisions compared with Germany's seven. Who I ask, needs security? I can leave unmentioned that besides these troops, the other nations also possess aviation squadrons, heavy artillery and powerful reserves of trained men and war material of a kind we do not possess at all."

Double Jeopardy

A correspondent assures us that the following notice has been posted around about an electric station in Donagel: "Beware! To touch these wires is instant death. Anyone found doing so will be prosecuted."

With a population that ranks 28th among the countries of the world, Canada is fifth in total exports and third in total turnover of trade.

Keep Minard's in the Medicine chest.

Settlement Scheme Nears End

Three Thousand Family Settlement Plan Has Been a Success

In a few weeks the 3,000 family settlement scheme will end and no project of the nature will take its place. Hon. Robert Forke, Minister of Immigration, stated recently. There was no desire to make the project endless one by replacing settlers who had abandoned farms, he said.

The project had been successful in every respect, and Canada had acquired an increase of about 17,000 souls through it. Already 3,250 families had been brought to Canada under the scheme; a total of 120 families had abandoned their farms for various reasons; 24 had been deported; 72 had returned to Great Britain of their own accord, while 414 remained in Canada in other employment, either in agriculture or other work.

WHAT OUR GIRLS NEED

When Languid, Anaemic and Feeling Run Down

When a girl grows languid, dull and irritable, when her complexion becomes pale, you may be sure the cause is in the blood. The blood is impoverished. The bright red color of the blood is caused by the presence in it of millions of tiny red corpuscles. It is these tiny bodies that carry nutriment from the blood to the tissues. They also cause the glow of life in the cheeks and lips. When a girl's blood is deficient in these red corpuscles her blood is impoverished, her nerves starved, and there is serious danger to her health. The blood is deficient in iron. It is a scientific fact that a course of Dr. Williams' Pink Pills will so enrich and purify the blood that all traces of anaemia and its accompanying weakness will disappear. An evidence of the value of Dr. Williams' Pink Pills in cases of this kind, Mrs. John F. Smith, of Station, P.E.I., says: "I am glad to take this opportunity of recommending Dr. Williams' Pink Pills. My daughter was in a badly run down condition; very pale, nervous and much depressed. We tried several medicines, but they did not seem to do her any good. I decided to give her Dr. Williams' Pink Pills. She began to improve, and after the use of a few boxes she had gained a weight, her appetite improved and she had a better color in her cheeks in fact she had fully regained her former good health. I would advise every mother of young girls to give them Dr. Williams' Pink Pills as the first sign of an anaemic condition. You can get a box of Dr. Williams' Pink Pills from any medicine dealer or by mail at 50c a box from Dr. Williams' Medicine Co., Brockville, Ont."

Zeppelin's Flight Cancelled

Atlantic Trip of German Dirigible Postponed Until 1930

A special despatch to the Telegraph from London from Friedrichshafen said that the trans-Atlantic flight of America of the dirigible Graf Zeppelin had been postponed until 1930.

A flight around the world for the big airship was scheduled to start about July 15.

The Graf Zeppelin's last attempt to fly to America ended on May 17, when crippled motors forced her to turn back over Spain.

Capital invested in the world's rayon industry now exceeds \$500,000,000.

It follows from the action of the Senate that the quotas of the various nations will be revised. The greatest changes will be in the quotas affecting Great Britain and Northern Ireland, Germany and the Scandinavian countries. British immigrants to the number of 65,721 will be permitted to enter the country as against the old number of 34,607.

Protests Ship Against Fire
Modern Livers Have Devise For Instant Detection Of Smoke

The captain on a modern liner can look into a cabinet and tell at a glance whether fire has broken out and also in what part of the vessel. Go into the hold of any properly equipped ship and light a cigar; in less than five minutes the captain of the bridge can tell where the fire is smoking. In the captain's cabinet is a series of glass-fronted tubes, one for each hold, through which air is constantly flowing. Ordinarily you can see nothing—all is black; but with the faintest trace of smoke from the hold there suddenly appears against this black background a thin, quivering thread of brilliant light. As long as the air current is pure there is nothing to see; but the moment a wisp of smoke flows through, the light rays make it show up against the black background like a meteor.

There are other fire-detecting devices also—devices that betray a ray at the slightest change in temperature. It is after they have passed their part that the modern fire extinguishers are brought into play. These are pipes which by the simple turning of a valve without opening the hatch or the hold in which the fire has started, can fill that hold with live steam, in which no fire can live. Or one can flood the hold through the same pipes with carbon dioxide, and again the fire is out, with negligible damage to most classes of cargo. Or the hold, can be flooded with a substance that flows over the flames like a blanket on the floor and smothers them.

Wise and experienced mothers know that children are troubled with worms and lose no time in applying Minard's Worm Expeller, a most effective vermifuge. It is also useful in clearing the system of worms and restoring those healthy conditions without which there can be no robust growth. It is a most trustworthy worm exterminator.

Revising Quota Laws

U.S. Will Admit Double Number Of British Immigrants

Nearly twice as many Britons yearly may enter the U.S. under the immigration quota after July 1. The Senate refused to prevent the national origin clause of the immigration act of 1924 from going into effect on that date.

It follows from the action of the Senate that the quotas of the various nations will be revised. The greatest changes will be in the quotas affecting Great Britain and Northern Ireland, Germany and the Scandinavian countries.

British immigrants to the number of 65,721 will be permitted to enter the country as against the old number of 34,607.

Unless worms be expelled from the system, no child can be healthy. Mother Graves' Worm Expeller is an excellent medicine to destroy worms.

Speckled Trout For Jasper Park Lakes

Anglers May Expect Real Sport In Canada's Largest Mountain Playground

So successful was the experiment made by the Dominion Government last year in stocking Maligne Lake, in Jasper National Park, with trout, that a quarter of a million more fish are now growing up in the hatchery there, and will be turned loose in the great glacial lake in a few weeks time.

An egg, the 250,000 travelled to Jasper from Cresco, Pennsylvania, last winter, and so carefully was the precious freight handled by the Canadian National Express that only 70 of the eggs failed to hatch. Arrived at Jasper, the eggs were given into the care of Warden Herbert Davis, who is carefully nursing them along. He feeds the multitude four pounds of chopped liver a day and keeps the water moving and at a proper temperature.

Early in June the fingerlings will be taken out of their trays and transported in tin to Maligne. The fish put in there last year," says it, Langford, supervising, "have done marvelously well and have grown to a good size. They and the new batch are speckled and will be caught a splendid rainbow trout in a few weeks for Cabin Lake.

For sunburn—apply Minard's Liniment.

Canadian Jersey Breeders

Good Market In States For Canadian Breed Jersey Cattle

Writing from Tupper, Mississippi, W. Elmo Ashton, chairman of the Canadian Jersey Breeders' Association, points out that it is apparent to anyone going through the states of Georgia, North and South Carolina, Mississippi and Alabama that the southern states offer a great market for Canadian Jerseys. In the past year and a half these states have taken from Canada over 300 head of young bulls and heifers.

Wretched From Asthma. Strength of body and mind are inevitably impaired by the attacks of asthma. Who can live under the cloud of recurring attacks and keep body and mind at their full efficiency? Dr. J. D. Kellogg's Asthma Remedy dispels the cloud by removing the cause. It does restore the sufferer to normal, healthy and mental happiness.

Small Churches In England
What is said to be the smallest ecclesiastical building in Britain is St. Margaret's chapel, Edinburgh. This little church is only 16½ by 10½ feet. Dorset church at Waterborne, Dorset, is 25 by 14 feet. Churches at Culne and St. Lawrence are also small, having less than 420 square feet of space.

Emerald Lake, Yoho Park
Beautiful Emerald Lake, in Yoho national park, British Columbia, was first visited by Tom Wilson in 1882 while searching for stray pack horses. As far as is known, he was the first white man to visit this lake.

HAMILTON ONTARIO

Western Representatives:
HUNTER-MARTIN & CO., REGINA, SASK.

Right Hon. W.S. Fielding, Former Finance Minister, Passes Away at Ottawa

Ottawa.—The Dominion of Canada was bereft of one of her most distinguished statesmen when, following a stroke which three days ago projected him into a state of coma, the Right Hon. Wm. Stevens Fielding, aged 70, passed away at his home in the Longwood Hotel, Ottawa, at 10:30 p.m. today.

On Friday, Mr. Fielding, who had been bedridden for the past half decade, sustained a stroke and it was then that the end could not be long delayed. His eyesight had failed, he was bereft of speech and the family, which gathered around him in his Charlotte street home, felt that it would be only a matter of hours until the life of the great statesman would pass.

Little hope was held out by Dr. G. S. McCarthy, the family physician, and when the end came it did so following a gradual and visible enfeeblement that portended death.

Mr. Fielding had long passed the allotted span of life and was in his 81st year, forty years of that life being spent in the service of Canada, in the provincial days of Nova Scotia, and from 1890 until his withdrawal from public activities in 1924, in the federal field.

He left public life as he entered it, poor in pocket, but rich in ideals, and rich in a record of honorable, up-to-date and self-sacrificing to his country.

The nation saw to it, however, that the days left to it distinguished and that the statesman who had sought in some measure to express tangibly its appreciation of the eminent services he had rendered following his retirement from public life, parliament voted Mr. Fielding a pension of \$10,000 per annum, and vote at least to which no voice was raised in opposition.

In the five years during which he was a total invalid, Mr. Fielding suffered many strokes. With extraordinary tenacity, however, he survived them, although each left him weaker than before. Not until his final seizure was there indication of his life giving out. He became unconscious and within a few hours signs were not wanting that a complete breaking down was near. The end came peacefully and with no return to consciousness.

Forty Believed Drowned

Bozota, Colombia.—Forty persons are believed to have drowned and about 100 injured in a terrifically total destruction of the town of Sevilla by floods from the Quindío river after it had rendered the hill into the river had caused it to change its course. Sevilla, which is in the department of Cauca, had about 4,000 inhabitants.

Sacrifices Life For Child

Kingston, Ont.—Kenneth McLeod, the four-year-old child of whom Freds sacrificed his life by throwing himself from the wagon he was driving on the highway five miles from here to save the child out of harm's path of an oncoming auto, died in hospital several hours later, never recovering consciousness after being struck by the machine.

Market Price of Wheat May Average Higher On Account of Smaller Crop

Washington. Using continuation reports received from all over the world, the United States Department of Agriculture announced that, exclusive of Russia and China, a world wheat crop five per cent. smaller than last year was to be expected for the 1929-30 season.

This reduction, the department said, would probably more than offset the 1928-29 season's surplus, and therefore seems likely that world market prices for wheat through the 1929-30 season will average somewhat higher than they have through the 1928-29 season.

The department summary of prospects was made from reports of winter killing and areas remaining for harvest up to June 12. The area to be harvested was expected to remain approximately the same as

Cabled French Airmen

Lindbergh Sends Message Of Congratulation To Trans-Atlantic Flyers

Paris.—Jean Anouilh, Rene Leveque and Armino Lotti, Jr., received by cable congratulations from Col. Charles Lindbergh, for their trans-Atlantic flight from Old Orchard, Maine, to Comillas, Spain, in the Yellow Bird.

The colonel's message, addressed to all three of the aviators, said: "On returning to New York I have just learned of your successful crossing. Please accept my sincere congratulations and best wishes."

The French flyers immediately cabled him in reply.

"We thank you heartily for your affectionate telegram. Our greatest claim to glory has been to have followed the route you traced two years ago with incomparable mastery in your flight from New York to Paris."

"Your magnificent example of courage, of tenacity, of science as a pilot and navigator guided us every step of our route. We address to you our most cordial and respectful salutations."

Prince To Invest Honors

Will Present Decorations Of Orders Conferred By King

London, England.—The Prince of Wales will hold two investitures on July 9 and 10. On behalf of His Majesty the Prince will present the insignia and decorations of orders and honors conferred in the birth day of our youth. We address to you our most cordial and respectful salutations.

The first investiture will be an official one, when all attending with wear levee dress. The second, following uniform custom, will be a "private" one and the recipients of orders will wear morning dress.

The Prince earlier this year held two investitures at St. James's Palace, when those receiving honors in the New Year's list attended. His Majesty the Prince will be held by the Prince on behalf of the King on July 3.

Solved All Murders

London Police Report All Murders Solved In 1928

London, England.—Every murder committed in London in 1928 was solved, and the culprit was convicted or took his own life, according to the official police report.

The report of the commissioner of police showed that there were 18 murders of persons more than one year old. Eleven culprits were convicted and seven committed suicide, the report said.

Another Gold Discovery

The Pas, Man.—Another important gold and copper strike in the northern mineral belt is reported by Harry N. Hayes, and W. E. Baker, who have just returned from a few weeks prospecting trip. The new find is on the north end of Tilkake about 12 miles east of Sherrill-Gordon.

Men In Fine Condition

Canadian Hockey Team Has Arrived In England

London, England.—In fine condition, prepared to battle for the trophies they lost last year, the Canadian team for Hockey arrived in England. The score or so expert marksmen participating in the National Amateur Association's great shooting meet at Biscay Camp, Surrey, opening in two weeks' time. On the youthful shooting team took part the son of the Governor-General's Foot Guards, Ottawa, rests the chief Canadian hope of capturing the Chasidic of the meet individual marksmen, the King's prize. Lieut. Durkin won this high award in 1924, and last year was close second. In 1927 also he lost by one point.

The two great team prizes, the Kipling and Macdonald cups, are also main objectives of the Canadians, who held them for three years and one year respectively. Last year the Old English took the Kipling cup and Australia captured the Macdonald cup.

Alberta Adopts Old Age Pension

Movement Now Accepted By All Provinces In Canada

Ottawa.—Answering the communication of Hon. Peter Heenan, minister of labor, informing them that an order-in-council had authorized his proceeding to negotiate with Alberta for the adoption of an old-age pension scheme, the government of that province telegraphed acceptance of the plan.

When the Dominion cabinet meeting approved the scheme for Alberta, Mr. Heenan acted immediately, and the reply came back to him within a short time of a letter of acceptance. Alberta will adopt the pension system starting August 1, 1929. British Columbia, Saskatchewan and Manitoba have for some years enjoyed the old-age pension scheme. Alberta's entry into the scheme links up the entire west in the movement.

May Revise Tariff

Drastic Changes Considered By Dominion Government In Report

Toronto.—The Toronto Globe published the following despatch from its Ottawa correspondent:

"Tariff changes which will have a revolutionary effect on Canada's external trade, are under consideration by the Dominion cabinet. In response to demands from all parts of the country for action, the government was taking preliminary steps toward what will undoubtedly be the most drastic revision of fiscal policy of the present century."

"Priority projects are the vital changes that take the form of a material increase in the tariff preference, if not the inauguration of complete free trade on the basis of British or Empire goods, while the general tariff, which applies to imports from the United States will remain stationary."

Experiment Fails

Hong Kong.—Army aviators carried out ring making experiments above Hong Kong, dropping a chemical known as 'Devil' from the clouds. The experiments were not successful. Hong Kong is suffering from severe water famine necessitating drastic action to replenish supplies.

Lacks Authority

Ottawa.—The exchequer court has given judgment that the Sun Life Company has not the authority to issue its charter, to increase its capitalization from \$2,000,000 to \$4,000,000. The judgment has been issued by Mr. Justice McLean.

Prince at Garden Party

Prince Henry, third son of the King, receives at a garden party held in honor of His Majesty's birthday, at Victoria, B.C. Lieutenant-Governor Randolph Bruce is on the right and Miss Helen Mackenzie, the latter's niece, on the left. The Prince is returning to England by Canadian Pacific steamship and will leave from Vancouver.

IN BRITISH CABINET

Margaret Bondfield, successful labor candidate, is the first woman to be appointed to a British cabinet. She is the new minister of Labor.

Warning Was Disregarded

Cleveland (Cine) Told In April That Film Used Was Dangerous

Cleveland, Ohio.—Making no attempt to fix the blame but pointing out that the Cleveland clinic had been warned of faulty X-ray staining

which cost 123 lives by fire and poison gases, May 15, Coroner A. J. Pearce completed his inquest after a month of investigation in a report on life with official county records.

The hearing was the Ohio inspection bureau of the fire underwriters' investigating service last April. It called attention to the fire hazard in the type of film used at the clinic, urged use of another kind and advised clinic officials that the film, if burned, would generate great clouds of noxious fumes. The film was stored in the basement and was ignited by a means not determined in the investigation.

The report stated the official number of dead at 123. They were killed by a combination of oxygen poisoning gas with carbon monoxide the corner said.

Canada's Wealth Increasing

Nine Hundred Million More Than In 1926 Says Report

Ottawa.—The national wealth of Canada exclusive of undeveloped natural resources, is placed at \$27,687,000,000 for the year 1927, in an estimate made public at the Dominion Bureau of Statistics. This is an increase of \$600,000,000 over the 1926 estimate.

On the basis of the estimated population in 1927, of 9,519,000 the per capita investment in agricultural wealth was \$442; in urban real property, \$760; in clean railways, \$310; in the forests, \$186; and in household furnishings and personal property, \$126. The per capita wealth of all kinds was \$2,609.

Message From Byrd

Paris.—The three fliers of the Yellow Bird, French trans-Atlantic plane, were congratulated by Commander Richard E. Byrd, in a message relayed from the Antarctic. The radiogram was addressed to Jean Anouilh, pilot; Rene Lefevre, navigator, and Armino Lotti, radio operator and financial backer. It said: "My heartfelt congratulations to you all for your brilliant flight in the Yellow Bird."

Will Not Resist

Lynn, Mass.—"I don't intend to get out, and no power on earth can make me. This old age stuff will have no effect on me." Thus said Police Chief Thomas M. Durkin, who is in his 54th year and who has been a policeman for nearly half a century, recently answered persistent rumors that he was about to resign.

New Agreement Is Arrived At To End Religious War in Mexico

Loss From Earthquake

New Zealand Reports Damage Estimated At Five Million

Auckland, N.Z.—Damage from the earthquakes which have shaken this group of islands, was estimated at \$5,000,000.

Thirteen lives are known to have been lost.

There have been 32 distinct shocks, the first of which was the heaviest and most damaging. It came with great suddenness. The entire landscape rocked and vast avalanches occurred everywhere as residents rushed from creaking, rattling houses.

Two bills appeared to observers to have meted away. Unbroken ridges suddenly descended, gullies, and it seemed as though the whole country might be churned into complete ruin by any moment.

Huge masses of hillsides slipped into Lake Rotiti with a roaring rumble which could be heard for miles. Lake Brunner was convulsed, the centre falling in. Then it rose again, shooting a colossal fountain of water in the air.

Health Authorities Conduct Investigations

Hundred People In Bowmanville, Ontario, Suffer From Plomine

Poisoning

Bowmanville, Ont.—Health authorities are taking extra precautions and conducting investigations as the result of the second outbreak of plomine poisoning here in four days, during which over 100 persons have been affected in varying degrees.

The first outbreak occurred when scores of children and adults were poisoned by contaminated milk. The second and more violent cases occurred at a Sunday school entertainment and supper. Tainted salads are believed to have caused the outbreak.

Prepare For Another Election

Liberal Party In Britain Sees Possibility Of Another General Contest

London, Eng.—The possibility of another general election in Great Britain at no distant date is being taken into account by the Liberal party, which holds the balance of power in the new parliament. The Liberal administrative committee passed a resolution moved by Sir Herbert Samuel, chief organizer, to maintain and strengthen the organization in the constituencies.

It was also resolved that "when ever an appeal is made to the government in the meantime it is expected that new evidence bearing on the case will be submitted to the federal authorities in the meantime. It is expected that the federal authorities will be convinced of the murder of License Inspector Harry Constable at Cochrane, Ont."

Ramsay MacDonald Formulates Plans to Meet Unemployment Situation

London, England.—Premier Ramsay MacDonald will preside over a cabinet meeting which will have the problem of the King's speech of the estimated number of men who are unemployed in the probable date of employment and the estimated cost.

In the domestic field his chief interest will be in the measures for meeting the unemployment situation. During the election campaign, Rt. Hon. J. H. Thomas, now Lord Privy Seal and minister of employment, gave some indications of Labor's unemployment plans by way of legislation.

These plans are two-fold, namely: 1. Raising the school age from 14 to 15 with allowance to parents. This is estimated to keep normally 600,000 out of industry for a year.

2. Supplementing the pensions of the over 65s, who are more than 45 years of age, so that they will be able to retire. This, Mr. Thomas estimates, will eventually relieve the labor market of another 400,000.

In Scotland, where the percentage of those in receipt of poor law relief is 10 per cent. in England, steps were taken to explore the available employment. The Scottish board of health sent an urgent message to all municipal authorities in Scotland,

Mexico.—Settlement of the controversy between the Roman Catholic church and Mexico was announced by President Portes Gil at the presidential palace.

The basis of the religious agreement is as follows: President Gil issued a public statement promising three things:

(1) The Mexican government will allow the Catholic hierarchy to designate those priests who are to register in compliance with the Mexican law.

(2) Religious instruction, while not permitted in the schools (which is specified in the constitution) will be restricted to the churches.

(3) The right is reserved to Catholic prelates to apply for modification of the constitution any time in the future, which is the same right granted all Mexican citizens.

The President's statement said it was not the purpose of the constitution or the government to destroy the identity of the Catholic or any other church, or interfere in any way with their spiritual functions.

A simultaneously issued statement from Archbishop Ruiz, papal delegate, said merely that the conversations with the President had been marked by a spirit of goodwill and respect and that as a consequence of the President's written public statement the Mexican clergy will resume religious functions pursuant to the laws in force.

It was not stated when religious services would begin, but it was believed the priests would commence to reoccupy the churches within a few days. It was August 1, 1926, that church services were suspended.

Will Enter Competition

Canadian Mounties To Enter Rifle Matches At Camp Perry, Ohio

Washington.—Four Royal Canadian Mounted Rifles will compete in the National Rifle and Pistol matches at Camp Perry, Ohio, in August.

The Canadians, the highest in 1929 revolver team competition, will fire against United States entries in the international police pistol match August 21. The four men are Corporals A. D. Ford, D. E. Forest and J. G. Peltier, of Lethbridge, Alta., and Constable J. D. O'Connell, of Ottawa.

Gets Month's Reprieve

Ottawa.—A reprieve until July 19, has been granted to John Ivanovich, night porter at the Hotel Chalmers, charged to hang on June 21, Cabinet, having considered the case, has decided to put the execution off for a month. In the meantime it is expected that new evidence bearing on the case will be submitted to the federal authorities in the meantime. It is expected that the federal authorities will be convinced of the murder of License Inspector Harry Constable at Cochrane, Ont.

Ramsay MacDonald Formulates Plans to Meet Unemployment Situation

London, England.—Premier Ramsay MacDonald will preside over a cabinet meeting which will have the problem of the King's speech of the estimated number of men who are unemployed in the probable date of employment and the estimated cost.

In Scotland, where the percentage of those in receipt of poor law relief is 10 per cent. in England, steps were taken to explore the available employment. The Scottish board of health sent an urgent message to all municipal authorities in Scotland,

Dominion's Capital An Attractive City

Champlain Was First White Man To See Place Where Ottawa Is Built

Three hundred years and more have rolled away since the first white man saw the site of the future capital of the Dominion. It was Champlain, the French explorer, who first intrepid and indomitable soul whose name is writ large upon the history of our country—Samuel de Champlain.

It was in the far-gone year of 1613 that the founder of Quebec, and the great architect of the Empire of New France, paddled up the unknown reaches of the Ottawa River from Montreal, and was halted by great falls of the Chaudiere below the cliffs, on which now stand the Canadian Houses of Parliament. He was the first white man to view the glorious panorama of hills, rivers and valleys by which the City of Ottawa is surrounded. There is ample evidence that Champlain stood upon the spot where Ottawa afterward was located, and where centuries later were erected the legislative halls of a new and great nation.

Champlain and his companions in the great westward voyage of discovery passed up the river, portaged at the Chaudiere, and went on their way to Georgian Bay, through the country of the Hurons, Algonquins and Ottawa. They encountered at the Chaudiere the evidence of that great Indian conflict between the northern tribes and the Iroquois of the south that ended eventually in the destruction of the Five Nations, but not before the northern tribes had paid the penalty. Here, at the Chaudiere, the Indian warriors of the North, coming down the Ottawa, encountered the French who availed them at the famous battleground. Hence, in the visions of the future Capital of Canada, the original Champlain fought their great decisive battles for supremacy and control of the upper half of the continent.

The history of Ottawa since Confederation is practically the political history of Canada. Here all the great legislative measures of the past sixty years have been formulated, and here all the effects of the tidal waves of public opinion have been felt. But Ottawa is more than a political centre.

Seriously the Capital is one of the most beautiful cities on the continent. Its location on the high hills overlooking the majestic Ottawa is unrivalled. Standing on the Bluffs, comprising Parliament Hill and Nepean Point, where Champlain first set foot, the visitor is confronted with a picture of river, lake and mountain unique in urban environment in North America.

In the summer months the Gatineau Valley attracts visitors from all parts of the continent to take part in its splendid fishing and hunting facilities. Ottavians say that the scenery of the Gatineau surpasses that of Switzerland, and the valley is a paradise for those seeking recreation and amusement.

Industrially and commercially the Capital has made vast strides during the past twenty-five years. Today the city numbers within its radius of three miles of the City Hall a population of almost 200,000. Its splendid streets, its magnificent driveway, its numerous and beautiful park system, and its many splendid and imposing commercial buildings and residences, mark it as one of the outstanding evidences of the prosperity and growth of the Dominion.

Largest Grindstone in World
What is believed to be the largest grindstone in the world was recently exhibited in London. It is 6 feet in diameter, 14 inches thick, and is built in 24 sections. The sections are grindstones in themselves, shaped in the form of a sector and joined to the hub to form the surface of the wheel.

The tax assessor thinks he has an excuse for being a pessimist.

Peile Mole, Paris
"You will recognize the road again for our return?"
"Yes. I have left my marks!"
Peile Mole, Paris.

W. N. 17, 1791

Egg Laying Contest

Steady Increase in Average Egg Production Is Shown

The Egg Laying Contests conducted by the experimental farms of the Department of Agriculture, at Ottawa, have been operating for nine seasons. Contests have been conducted year by year for all Canada, and for the province of Ontario, at Ottawa, and at one place in each of the other provinces.

To the report of the work for the sixth, seventh and eighth annual contests, published in Bulletin No. 108, of the Department of Agriculture, it is shown that up to the end of 1927, 25,820 hens had been tested in 1919 tests. The testing began in 1919, with 1,610 birds, which gradually increased to the highest point of 4,229 in 1925-26, which was ten birds higher than the year following. During these years there was a steady increase in the average egg production up to 1925-26, when it reached 179.5. This was an improvement of 57 eggs over the average of the first year of the contest. In the past tests, which have the twofold purpose of stimulating interest in the feeding of birds for egg production and the providing a medium for the qualification for registration, the birds are kept constantly housed in flocks ten and twelve, and in 1919 breeds: Barred, White and Partridge Plymouth Rocks; White and Silver Laced Wyandottes; Single Comb Rose Comb Rhode Island Reds; White, Brown, and Buff Leghorns; Single and Rose Comb Andalusians; Gamefowls; Chantrelles; and Jersey Blacks.

Englishman Invented Thimble

Hero Became Instantly Popular and Inventor Made Fortune

The thimble, a seemingly insignificant little article, is nevertheless an important metal worker in England, and why this useful little article is called a thimble, according to a writer in Popular Knowledge.

The thimble, a sewing accessory that appears to be too simple for any comment, nevertheless resulted in the acquisition of a great fortune by its invention.

Less than two hundred years ago the thimble was unknown to the civilized world. The story of the perfecting the fingers from needle pricks as well as supplying sewing, suggested itself to John Lofting, an humble metal worker in England. He constructed a metal top that fitted snugly on the thumb, because of its resemblance of a bell and its being worn on the thumb, the invention was called a thumb-bell. The article was immediately acclaimed all over England for its usefulness in sewing and the demand for it was widespread. Lofting was obliged to manufacture the article on a large scale and before long found himself a wealthy man. After a while the invention was constructed to be worn in the middle finger, and the name of thumb-bell was changed to thimble or thimble.

An Apt Reply

Clever Wit Shown By Speaker During British Elections

The best reply in the British elections of a candidate to a heckler must surely be that of Mr. Somerset Stopped Brooke. The Liberal candidate for the Gullford division, Mr. Stopped Brooke is in his early twenties. He was president of the Oxford Union a few years ago, and a devotee of the famous divine. A Tory lady at his meeting at the village of Greatport, put the question, "Don't you think you are too young to be in Parliament?" Mr. Stopped Brooke replied: "Well, madam, I would rather go into Parliament in my first childhood than in my second." That ought to be a classic in this age of youth. Another of his scores with hecklers was when a drunken man interrupted a meeting and demanded if this was not a public meeting. The candidate said, "This is a public meeting, my friend not a public house." From "The Passing Word," in Manitoba Free Press.

Maybe He Would

"I'll bet if I was married I'd be told to tell my wife where to head the complete bachelor." "Yes," retorted the old married man, "and I suppose when you get a railroad crossing you bank your head to warn the oncoming express to get out of your way, don't you?" Perhaps the man who says while he shaves merely has a better razor than the one who grows.

The Feeding Of Dairy Cattle

More Profitable For Average Farmer To Feed Mangals Rather Than Sugar Beets

Experiments would indicate that there is little to choose between mangals and sugar beets for the feeding of dairy cattle. This was shown at the Agassiz, British Columbia, experimental farm last year, in which the slightly better gains in milk were obtained from the use of sugar beets, which, however, were offset by the greater difficulty of feeding the beets. The experiment was conducted during February and March. Each cow under test was fed, in addition to a ration of mixed grains, alfalfa hay and ensilage, thirty pounds of roots. The experimental procedure was on the three periods plan. During the first and third periods one of the two roots was used in the ration, during the second or intermediate period the other root was fed. The results of the test are given in the report of the superintendent of the station for last year, published by the Department of Agriculture, at Ottawa. Ten cows were used in the trial. In the table of results it is shown that to produce 100 pounds of milk, 11.6 pounds of mangals were required in addition to the other feeds, 11.6 pounds of mangals as compared with 11.6 pounds of sugar beets. The cost of the entire ration to produce 100 pounds of milk was \$1.85, when the mangals were fed, and \$1.91 when the sugar beets were fed. In the production of a pound of butter fat, there was almost a cent difference in favor of the sugar beet ration. During the week the two cows were getting mangals, according to this report, they gave 55.0 pounds of milk less than the week they were fed on the sugar beets. Sugar beets yield slightly less milk and are more difficult to handle than sugar beets. The report of the station, regards it as a wise practice to adhere to the growing of mangals rather than sugar beets for the feeding of milking cows.

Age and Usefulness

Many World Leaders Are Remarkably Young In Intellect

Too old at young is disproved in many places. Many men, old in years, but young in intellect, are the world's leaders. For instance, at the world court, one notes Lord Phillimore, aged eighty-three, associated with Elinor Roosevelt, eighty-three, and John Russell Moore, who has just died. The fact is that a man is just as old as he feels regardless of his years. Burning the candle at both ends at twenty is not likely to result in mental vigor at seventy.

Laugh and the world laughs with you; grieve and the world laughs at you.

Highest Note in Organs
Wires from this console in the Auditorium of the Royal York Hotel, at Toronto, lead to a chamber behind the stage where the largest and finest organ in Canada, and one of the finest in the world has been installed.

This is the crowning achievement of the organ of the Royal York Hotel, at 31, Hyacinthe, Quebec. The only organ in Canada equipped with five manuals, it consists of six organs: Great, Small, Choir, Organ, and Pedal. A list of its parts reads like a catalogue of the most complete of organs. In truth it is. The Great Organ contains 20 stops and 1,761 pipes; the Small Organ contains 10 stops and 1,761 pipes; the Choir Organ contains 17 stops and 1,346 pipes; the Organ contains 18 stops, 1,088 pipes, 51 harp bars, 25 tubular chimneys, 37 xylophone bars and castanets; the Bourdon Organ

Shrubbery Bloom on the Prairies

Flowering Shrubs Found a Succession From June Throughout the Season

Flowering shrubs of various kinds cultivated in the Prairie Provinces provide a succession of bloom from June to the end of the season. The procession commences with the Dogwood in April, followed by the graceful yellow calyx of alders, birches and hawthorn, and the pussy willow. In early May floods of bloom commence with Siberian Apricot, Siberian Alder, Saskatoon, double flowering Plum, Nivea Plum, and Japanese Cherry. The crabs and apples frequently exhibit billows of white and pinkish bloom by Empire day, when the Sand Cherry and Red Elders are also usually in flower. The Persian Lilac blooms in June along with the Tartarian Honeysuckle, Hawthorn, Spiraea, Flowering Currant, Mountain Ash, Dogwoods, and other shrubs. By mid-June flowering is provided by Menzies' Spirea, Double-leaved Spirea, Arrowwood, Juniper, Snowball, Mountain Ash, Mountain Maple, and Bittersweet. The Hawthorn, Cranberry and European Ash are luxuriant followed by the various shrubby Potentillas which are described by Mr. W. R. Lester, superintendent of the Morden experimental station, in his report for last year, as persisting to the end of bloom over a long range of time. It has been demonstrated too at the Morden station that with the coming of July, the Japanese lilac and Amorpha fruticosa become effective, followed again by Black Elder, Golden Elder, and Spirea. Norfolk Island, followed again by Cut-leaved Elder, Laxaria, Anthony Waterer, and Maximilian. The report of the station, published by the Department of Agriculture, at Ottawa, gives very interesting information on such other ornamental as roses, peonies and lilies, and other flowers that may be used with fine effect in the public parks and on private grounds in the Prairie Provinces.

Some Old Timepieces

Many Beautiful Ones Are In Guildhall Museum, London, England

Guildhall Museum, in London, England, has some of the most beautiful and old timepieces in existence. One sets a sea-saw rocking every hour; another denotes time by musical tones. A "clock watch" of 1580, has pins set at each hour so that time can be ascertained by feeling. There is one large clock of the Empire period whose face miniature negroes strike the hour on bells. A giant watch is six inches across the face. This however, was worn on a giraffe and not intended for a pocket.

He: "Did you have a good time at your party?"
She: "Wonderful—two girls and sixteen boys came."

Did Not Trust Bank
Boer Farmer Thought Money Was Safer At Home
A Boer backer in a remote part of the Transvaal began to have doubts, owing to native depredations, as to the safety of £200 he had stowed away under his bed. A friend advised him to deposit the cash at a bank in the nearest town and they would look after it for him. The farmer did so, and asked the bank manager what would be his charge for keeping it safe and sound. On being told that far from there being any charge, the bank would pay him 10 per centum, he "smelt a rat," and brought the money back to his farm.

Knows It All
"We have had evidence of Polonius to his son."
"And Lord Chesterfield's letters to his son."
"Well?"
"Have we no wise men nowadays?"
"Twenty of them. But no wise man would attempt to tell his son anything."

What Makes Our Friends
It is not seeing one's friends, having them within reach, hearing from them, and from them, which makes them ours. Many a one has all that, and yet is not getting on, because in their, the depending on them, is sure that they are good and true to him, and therefore could not but be good and true toward everybody else, ourselves included.

Will Have Office In London
An imposing five-story office building and show-room will be erected by the Ontario Government in London, England. At a cost of about \$250,000, it is announced by Hon. G. Howard Ferguson, Premier of the province. The building will have a frontage of 20 feet and will be located on the Strand.

National Parks Roads
There are slightly over four hundred miles of standard motor roads in Canada's national parks. The following are the parks: Banff, 217; Jasper, 62; Yoho, 20; Glacier House, 20; Revelstoke, 19; Waterton Lakes, 20; Kootenay, 62; Prince Albert, 10; Elk Island, 11; Pelly, 10; and 10.

Sailed Over Familiar Ground

Historian Says Columbus Made First Trip As Obscure Sailor

Christopher Columbus visited America as an obscure sailor aboard a Portuguese vessel several years before his historic voyage of discovery in 1492, according to claims of the historian, Louis Ulloa, in a forthcoming issue of the "Revista de Historia," which is based on new and original research.

According to the story as recounted by Ulloa, the three brothers Columbus carved did not sail on an uncharted sea but followed a trail blazed by daring seafarers since the days of Larf, the Lucky Ulloa's claims may be summarized as follows:

Columbus was only one of many who visited and revisited the Americas. On his first cruise the vessel touched at Haiti. He thought he heard the black natives term the land "Cipangu" and concluded he had reached the land of Cipangu and had recorded in the chronicles of Marco Polo. He returned to the Canary Islands and made his way to the nearest court to interest some monarch in another voyage.

Ferdinand, of Castile, and Isabella, of Aragon, did not lend a ready ear to the tale of the seaman, but the queen allowed herself to be swayed by the word of her confessor, a priest, in whom Columbus confided under the seal of the confessional. The agreement, subsequently drawn indicated that the sovereigns were aware Columbus was not making the trip for the first time.

Facts alleged by Ulloa and other historians pale somewhat the achievement of Columbus as a discoverer. Columbus' cruise, surrounded now by a wealth of legend, exacted a time when political and economic conditions had severed the splendid contacts that existed with America. But Columbus knew of the route through the Portuguese, Italian and Scandinavian, and, knowing this, he set out on his perilous passage of the ships setting sail to the new land, according to Ulloa's claims.

Japanese Using Motor Cars

Picturesque Likelihood Is Being Replaced By Modern Mode of Travel

The riksha is going the way of the horse-drawn buggy and soon the picturesque form of conveyance will be a thing of the past. In Japan the ancient riksha in the form of the horse-drawn carriage is no longer made those mammoth war canoes, 50 feet long, six feet beam, with beautiful lines, hollowed from a single tree and capable of holding 20 persons; but they may be seen at Yamanote, Saito, and elsewhere.

Along the coast, wherever there is any considerable settlement the traveler may still buy fine specimens of the basketry, carved ivory and copper work for which the natives of Alaska are famous.

Did Not Trust Bank
Boer Farmer Thought Money Was Safer At Home
A Boer backer in a remote part of the Transvaal began to have doubts, owing to native depredations, as to the safety of £200 he had stowed away under his bed. A friend advised him to deposit the cash at a bank in the nearest town and they would look after it for him. The farmer did so, and asked the bank manager what would be his charge for keeping it safe and sound. On being told that far from there being any charge, the bank would pay him 10 per centum, he "smelt a rat," and brought the money back to his farm.

"And Lord Chesterfield's letters to his son."
"Well?"
"Have we no wise men nowadays?"
"Twenty of them. But no wise man would attempt to tell his son anything."

Old Klondike Is Passing

Civilization and Modern Ideas Are Changing North Coast

It is just about 30 years since the magic name "Klondike" rang around the world, and gave rise to the greatest mining "rush" in the history of the world. It added more to the wealth of the world in raw gold than has ever been taken from any similar expanse of territory. Mining, which once drew its career on in many parts of the great Yukon land, but it is on a large and highly organized scale. Old-timers claim that we shall see a return of the days when the prospector, armed only with a pick and shovel and a stout bear, may go forth and dig his fortune from the frozen creek bottom or bench land; but for the present this mysterious land is not so much the Eldorado of the gold hunter as of the modern tourist who seeks to pick the treasures of romance along with the old trails, and to see again with the eyes of the people of figures—bizarro, heroic, wicked, gay, morose, hopeful and careless—which once trod the gold and made its brief but stirring history.

The primitive civilization which the early pioneers found in the country in Alaska and the Yukon remains much as it was. The additions to the old life, which are little changed, except for the better. The communal legends of the Indians are still to be seen; and the primitive forms of the north are still frontier towns, tempered by modern comforts. They will show you the graves of the old Klondike, the place in Wrangell where the "Single O Kid," a quiet youth of 19, held up a band of gamblers and cleaned them out at the point of his steady gun; but in the former place you will also find a most comfortable and beautiful flower garden, while Wrangell is now a quiet town with flourishing industries.

But civilization and modern ideas are stalking up the north coast, and those who would see this country as it was must hasten. The grotesque totem-poles, the fantastic trees of the coast Indians, are no longer being made, although "reproposed" as of other antiquaries, are coming on the market, but steps are being taken for the preservation and restoration of some of the finest of the old specimens. The Indians no longer make those mammoth war canoes, 50 feet long, six feet beam, with beautiful lines, hollowed from a single tree and capable of holding 20 persons; but they may be seen at Yamanote, Saito, and elsewhere.

Along the coast, wherever there is any considerable settlement the traveler may still buy fine specimens of the basketry, carved ivory and copper work for which the natives of Alaska are famous.

Did Not Trust Bank

Boer Farmer Thought Money Was Safer At Home

A Boer backer in a remote part of the Transvaal began to have doubts, owing to native depredations, as to the safety of £200 he had stowed away under his bed. A friend advised him to deposit the cash at a bank in the nearest town and they would look after it for him. The farmer did so, and asked the bank manager what would be his charge for keeping it safe and sound. On being told that far from there being any charge, the bank would pay him 10 per centum, he "smelt a rat," and brought the money back to his farm.

Knows It All
"We have had evidence of Polonius to his son."
"And Lord Chesterfield's letters to his son."
"Well?"
"Have we no wise men nowadays?"
"Twenty of them. But no wise man would attempt to tell his son anything."

What Makes Our Friends
It is not seeing one's friends, having them within reach, hearing from them, and from them, which makes them ours. Many a one has all that, and yet is not getting on, because in their, the depending on them, is sure that they are good and true to him, and therefore could not but be good and true toward everybody else, ourselves included.

Will Have Office In London
An imposing five-story office building and show-room will be erected by the Ontario Government in London, England. At a cost of about \$250,000, it is announced by Hon. G. Howard Ferguson, Premier of the province. The building will have a frontage of 20 feet and will be located on the Strand.

National Parks Roads
There are slightly over four hundred miles of standard motor roads in Canada's national parks. The following are the parks: Banff, 217; Jasper, 62; Yoho, 20; Glacier House, 20; Revelstoke, 19; Waterton Lakes, 20; Kootenay, 62; Prince Albert, 10; Elk Island, 11; Pelly, 10; and 10.

Consumption Of Wheat Found To Have Declined Considerably In Recent Years

Is wheat bread no longer the stout staff of life it used to be? Statisticians whose business it is to look to the matter find that the consumption of wheat has shrunk from 5.6 bushels per capita in 1912, to 4.3 bushels per capita in 1926. Into the cause of this decline the United States senate has ordered the secretary of agriculture and the secretary of commerce to investigate. These two departments of the Washington government are to report to the senate not later than the beginning of the session of congress which meets in December.

The result of that inquiry will be interesting to all countries in which wheat is produced on a large scale, and to no country more than to Canada. They will be curious to know if people are changing their habits of eating, and are finding more satisfaction in supplementing their grain food by other edibles. That there has been a remarkable increase in the consumption of green vegetables and fruits and of preserved vegetables and fruits is not in doubt, but it would be surprising to learn that the consumption of these foods has gained upon the consumption of wheat products so as to displace at least 25 per cent. of the latter. Green vegetables and fruits in the form of salads have undoubtedly taken a considerable percentage of the demand that formerly went to meats, but their part in lowering the consumption of bread was not generally suspected to be great. Yet let any observer of people who take their lunches at cafeterias speak and he will probably say that it is not worthy how generally they pass by the bread rolls and biscuits to all their order from other sources.

Tastes change, new appeals to the appetite are brought forward, and the advice of dietitians is being followed as it never was followed before. It seems improbable that the decline in the consumption of wheat bread is owing to enforced frugality. A very large part of the world's population can afford better meals than they could before the war, if, as appears to be the case, people diversify their foods more than in former times, the hint should be taken by our western farmers to diversify their agriculture and produce more kinds of foodstuffs than they now produce. Mail and Empire.

Moose Jaw a Milling Centre
Is Now the Second Largest Milling Centre in Western Canada
Moose Jaw is now the second largest flour milling centre in Western Canada. The Idaho Road Mills produce 4,000 barrels of flour, 3,200 cases of cereals and a heavy tonnage of standard stock foods every day. Moose Jaw is also the Prairie live stock centre and headquarters of the Saskatchewan Feeder Show and Auction Sale, with 5,000 head of cattle and 10,000 sheep on show annually every October.

The Wrong Tickets
It was dusk and the ticket inspector went to the young couple on the back of the bus.
The youth, slightly indignant at the interruption, thrust out his folded tickets.
"We do not stop there," said the inspector courteously.
"Where?" inquired the youth.
"At the pawnbrokers'."
First Woman: My husband is so nervous. If the slightest thing goes wrong he loses control of himself. I hope yours isn't like that.
Second Woman: Mercy! No! He is as hard to rattle as a feather pillow.

How To Order Patterns
Address—Winnipeg Pattern Union, 175 McMillan Ave., Winnipeg
We suggest that when you send for the younger fashions, it is attached to an underwaist. The two-piece suit with white vest, printed, satin, blue and beige jersey, printed and blue with white, printed, blue and beige, colorful rayon and wool crepe are smart and serviceable. Pattern comes in sizes 6, 8, 10, 12 and 14 years. For the 8 year old size 1 1/2 yards of 36-inch contrasting, and 3/4 yard of lining is all that is needed. Price 25 cents in stamps or coin (not preferred). Wrap coin around.

How much is this book?
"The proper price is eleven here, but the author has signed his name in it, and so..."
"And so I may have it cheaper?"
"A damaged copy." It Travels Home.

Poultry Registration

Growing Demand For Stock Of Registered Poultry Is Shown

The Egg Laying Certificates carried on by the Federal Department of Agriculture at the central farm, at Ottawa, and at certain of the experimental farms throughout the provinces, has for one of its chief objectives the discovering of qualifications in individual birds for registration. In a report of the eight counties that have been held up to the end of 1927, issued in Bulletin No. 108, of the Department of Agriculture, at Ottawa, it is shown that 4,492 males had qualified for registration, and at least a second generation registered female. Both males and females are also required to be subjected to standard quality tests, constitutional vigor and breed type. This report indicates an enthusiastic appreciation of the registration work which is shown by the increasing numbers of birds entered for test each year and the growing demand for stock from registered parentage.

Importing Sheep From England
Five Head From Royal flock Purchased By B.C. Breeders
Sheep from the famous flock of the Majesty King George, are being imported on Vancouver Island and will soon arrive at their new pasture in the Sooke Hills.
C. E. Walney-Gibbs, director of the Canadian Sheep Breeders' Association, who with his brother-in-law, J. H. Walney-Gibbs, are breeders in British Columbia, has purchased five head from the South-down flock which was started many years ago by the late King Edward, when Prince of Wales.

Introduction of new blood is said to be urgent, and the fact that the flocks in this province, and nowhere can this be better obtained than by the importation of pure-bred stock from some of the noted sheep districts of the old country, according to breeders at Victoria.

Exhibit Canadian Furs
Proposed To Send Collection To Fur Exhibition At Leipzig, Germany
An exhibit of Canadian furs valued at \$75,000 will be included in the fur exposition in Leipzig, Germany, this summer, if plans of leading Canadian buyers mature. Consideration is now being given by Hon. James Macdonald, Minister of Trade and Commerce, to a proposal that the Government buy the exhibit, erecting and staging the exhibit. A collection of the most beautiful furs produced in this country is being made for the purpose.

Poison Gas
A monument recently unveiled at Stenstaete commemorating the first German attack upon poison gas. The inscription reads: "On April 22, 1918, the troops of the 87th Territorial Infantry Division and the 40th Infantry Division were poisoned by the first cloud of gas. Since then, the victims of that abominable method of warfare have died every day in peace time."

A Real Optimist
"Now, young sir, what is it you want," said an old woman who kept a tiffin stall to a little boy.
"Nothing minus," replied the kid.
"I just come to see what I might have got if I hadn't lost my penny!"
"Hey, there, don't you dare park that car of yours near my horse."
"Don't worry. I know the city rules are not to park near a plug."

SUN PARLORS FOR CANADIAN TRAINS

Parlor cars with glassed-in observation platforms are the latest addition to the equipment which the Canadian National Railways are using on their trains between Winnipeg and Duluth and the boat trains between Winnipeg and Port Arthur. Vista glass is used in these sun parlor cars, this type of glass letting in 75 per cent. of the violet rays—the health-giving part of sunlight—which are not able to pass through ordinary glass. The size of the windows permits unobstructed vision of the scenery and the cars have been tastefully decorated. They represent the most up-to-date type of rolling stock in use on the continent.

For Land Settlement

Colony Finance Corporation of Canada, Ltd., and managing-director of the Imperial Life Insurance Company. The Colonization Finance Corporation has entered into an important agreement with the Canadian Colonization Association for the settlement of privately owned lands.

J. F. Weston, vice president of the Colonization Finance Corporation of Canada, Ltd., and managing-director of the Imperial Life Insurance Company. The Colonization Finance Corporation has entered into an important agreement with the Canadian Colonization Association for the settlement of privately owned lands.

Although upwards of 10,000 buffalo have been shipped into the reserve by the government, D'Aoust declares that at the most there are not over 100 animals here now, including the original herd of 1,500 wood buffalo. He estimates that 75 per cent. of the young shipped in have died from the injuries received in transit and the few which they had to face on being freed.

Solves Old Problem

Geological Survey Tells What Comes Of Rain Water And Snow
What becomes of the rain water and snow?

The question has been answered by the geological survey of the department of the interior, at Washington, after a three-year study of the Pomperaug Basin, in Connecticut, which is regarded as a typical area. Of about 14 inches of water that falls annually in the basin as rain or snow, 21 inches flows out through streams. Twenty-seven inches of it is returned to the atmosphere by the process of evaporation from the soil, water surfaces and surface objects of the river water first finds its way underground and reappears in springs and seeps.

Encourage Sheep Raising

Project Launched in Manitoba To Place More Sheep On Farms
The plan recently launched by Lieutenant-Governor J. D. McGeorge, of Manitoba, to place more sheep on the farms of the province, and which led to the formation of the Manitoba Livestock Credit Company, to finance the project, is making headway in the Brandon area. A committee has been appointed, with J. C. Risdell, manager of the Canadian Bank of Commerce, as chairman, to handle the applications for sheep. The committee needs no pecuniary gain and railways, banks and other large financial bodies are backing the project.

Decline Of Oratory

Debates In Parliament Are More Business Like Than Formerly
The fact that orators are now few and far between in Canadian public life is marked contrast with the number who flourished in the decades immediately succeeding Confederation is quite often made the subject of comment. But it cannot be denied that the proceedings of the several Parliaments of the Dominion are now conducted in a much more business-like manner than was formerly the case and that in spite of the decline in oratory, the tone of debate is much less snigger and less vituperative than was formerly the rule—Brooks Recorder and Times.

Canadian Grasses

Scientific Study Will Result In Increasing Value Of Pastures
The scientific study of Canadian grasses has brought such good results that the Canadian farmer, in certain circumstances, will be able to triple the value of his pastures. Dr. Frank T. Shutt, Dominion chemist from Ottawa, told the Dominion chemical convention at Toronto, the course of an address on the subject of the experimental farms.

Sunday School Teacher

(reading of the deluge): "And then it rained for forty days and forty nights."
Bright Pupil: "And were the farmers satisfied then, teacher?"
"Why?"
"She hadn't gotten cloth to make a coat, and she had to strengthen it with fur."—Laurie Kolmer Zeitling, Columbia.

American Universities To Put On Special Course For Criminal Research Work

Buffalo Herd Menaced By Wolves

Pack of Wolves Play Havoc With Buffalo In Slave Lake Reserve
Wolves are taking a heavier toll of buffalo from the Slave Lake reserve than Epidemic or disease, states J. D'Aoust, former warden in the reserve, who has just reached Edmonton from the north.

There is one pack of wolves in the park, between ten and fifteen in number, which kill upwards of a hundred buffalo each year, despite the efforts of the ten guardians who are continually hunting the grey wolves. D'Aoust was stationed on Slave River, 35 miles north of Chipewyan, and patrolled a line some 60 miles in length. In this section alone he found the remains of 11 buffalo that had been killed by timber wolves during the past winter.

Although upwards of 10,000 buffalo have been shipped into the reserve by the government, D'Aoust declares that at the most there are not over 100 animals here now, including the original herd of 1,500 wood buffalo. He estimates that 75 per cent. of the young shipped in have died from the injuries received in transit and the few which they had to face on being freed.

Toll of wolves on the area enclosed by the reserve at the time it was set aside are permitted to continue to hunt and there they have killed any buffalo. It is very rarely that they break this regulation. Whites are not allowed to hunt or trap within the reserve.

Using Lumber From B.C.

Japan Takes Millions Of Feet Yearly For Making Bathrooms
Millions of feet of British Columbia lumber are being used each year in Japan in the manufacture of bathtubs, according to a Vancouver man who recently visited the Orient with a view to the disposal of Canadian lumber.

"The Japanese," he stated, "are devoted to bathing as a sort of passion. The Japanese who does not take a bath once or twice daily is a rare individual. Every house, even the smallest cottage, possesses a bath of some sort. They use 150,000,000 feet of lumber in manufacturing tubs, and of this much is British Columbia fir or cedar."

Least of all, the Japanese cling to the habit of sleeping on the floor, and for that reason they prefer British Columbia hemlock rather than fir for flooring, because it is not so much resin in the wood and it does not rot when dried out.

Leather slippers are the footwear of the rich. The great masses of the people wear wooden shoes called "geta." The geta absorbs perhaps one board foot of lumber for each pair, nearly a million feet of lumber being used annually for this purpose.

Decline Of Oratory

Debates In Parliament Are More Business Like Than Formerly
The fact that orators are now few and far between in Canadian public life is marked contrast with the number who flourished in the decades immediately succeeding Confederation is quite often made the subject of comment. But it cannot be denied that the proceedings of the several Parliaments of the Dominion are now conducted in a much more business-like manner than was formerly the case and that in spite of the decline in oratory, the tone of debate is much less snigger and less vituperative than was formerly the rule—Brooks Recorder and Times.

Indignant at the growth of crime in its body politics, the regulation smirched by the smoking guns of gangsters, the City of Chicago will cradle its own potential deliverer—the super-detective.

This creature, heretofore only a myth of fiction, will be made into flesh and blood to replace the policeman whose chief qualification often is but a stout heart.

Two of America's leading universities, both in Chicago, have hung up handbills on the wall for the heretofore undetected murderer, thief, kidnapper, racketeer and other transgressors on the peace and comfort of society. Police work will henceforth be a part of the curriculum of the Northwestern and Chicago universities and racket-ridden Chicago will be their research laboratory.

August Vollmer, chief of police at Berkeley, Calif., will head the new department at Chicago, and will inaugurate the course at the beginning of the fall semester next. October Leonard White, professor of local community research committee at the university, who worked on the plans with Chief Vollmer, said that while the course will be confined at the outset to the problems of police administration, it will become eventually a criminal law study in which the student may gain a degree.

Every avenue of learning that can aid in the tracking down of a criminal will be thrown open to the embryo detectives, White said. The course eventually will be designed to permit special study of one or two years as well as the full four-year college course for those who wish it. An inter-departmental committee will co-operate with Professor Vollmer to see that his students are well-grounded in all the sciences necessary to intelligent investigation.

The student undertaking the full course will study the chemistry of poisons, criminology, sociology, psychology, physics and anthropology and learn to apply the studies to the investigation of crime.

West Produces Finest Wheat

German Millers Have Highest Opinion Of Wheat Grown In Western Canada
Canada

Wheat from the Prairie Provinces of Canada is the finest received in Germany from any country in the world, according to Johann Lange, one of the seven German millers making a tour of the North American wheat-growing and milling centers. "Canadian mills are second to none if mills stuffed in Winnipeg may be accepted as representative of Canadian plants," said Mr. Lange. "In operation, the mills are the beauty of the flour turned out we have seen nothing better since we arrived on this continent."

Started Ten Years Ago

The movement for the preservation of national historic sites in Canada dates back to the year 1919. Representations were made then to the Dominion Government urging the necessity of a national organization for the preservation of historic sites and as a result an honorary Historic Sites and Monuments Board was created. This board is composed of a number of eminent Canadian historians who have given their services without compensation.

Road To Sherritt-Gordon Mine

With the roadhead coming, laying out the line for the Sherritt-Gordon branch, Cranberry Portage to Cold Lake, is near Sherritt-Gordon Mine, started, and by the end of August the job should be near completion. Sherritt will then take line its 1,700-ton mill.

"Mother, that lady must be very poor."
"Why?"
"She hadn't gotten cloth to make a coat, and she had to strengthen it with fur."—Laurie Kolmer Zeitling, Columbia.

WORLD HAPPENINGS
BRIEFLY TOLD

Manitoba contemplates celebrating its diamond jubilee on July 15, 1930. It was announced at Winnipeg by Premier John Bracken.

The London Daily Sketch said Premier MacDonald had refused Lord Trosky, former Russian war chief, permission to enter Great Britain as he requested recently.

The Japanese naval training cruisers "Akuma" and "Isuzu" will visit Vancouver on August 10-12. It was stated at the Japanese consulate there.

Albert Voight, a German, has left Seaward, Alaska, in a 16-foot, cold-water walrus skin sailboat for New York. He hopes to complete his 6,700-mile trip in six months.

Charles Colerbrook Patterson, eldest son of the late Hon. J. C. Patterson, former lieutenant-governor of Manitoba, is dead. He was born in Ottawa, in 1868, and for a number of years was his father's secretary. Flight tests will soon be made of television apparatus calculated by its inventor, C. Francis Jenkins, Washington physicist, to reproduce conditions as in the sky, on a screen miles away.

Japan's co-operation in any disarmament program negotiations that Premier Ramsey MacDonald and Ambassador Dawson may have begun has been promised by Premier Tanaka.

France is preparing to bring into force a whole scheme of social insurance. It will cover sickness, old-age incapacity, maternity benefits and, to a certain extent, unemployment.

Captain A. N. Evans, inspector in the Royal Canadian Mounted Police, who has been stationed at Vancouver for some time, has been appointed inspector in charge of the Arctic sub-district, with headquarters at Herschel Island.

Representatives of all the provinces will be called together by the Federal Government next autumn to consider the federal and provincial financial problems, according to intimations received at the Parliament buildings, Victoria.

Germans Invent New Ship

Safer and Cheaper Than Existing Models Is Claim

A new kind of ship is being built by a German ship building company, which, it is expected, will be safer and more economical than existing models. The feature of the invention is the unusual shape of bow and stern, designed to press water down rather than to each side, and to reduce friction on the sides. It is said to cause the water to flow by the shortest route from bow to stern. Three high-speed fishing trawlers recently have been built by Deschamps on the new principle. The builders announce that not only is the fuel consumption reduced but the cost compared with other vessels of equal size, but that rolling and pitching even in heavy seas is reduced to an extent not previously attained. Test trips also have shown excellent steering capacities.

A Severe Attack of
Dysentery
Checked by 4 Doses

Mr. I. Burtonwood, 629-22nd St., W., Hamilton, Ont., writes: "My child, when only seven months old, had a very severe attack of dysentery, and after three days' treatment with other things we decided to use Dr. Williams' Pink Pills."

"The medicine has been on the shelves for over 30 years, but it has only been in the last few years that it has been so widely known."

"We both always keep a bottle of Dr. Williams' Pink Pills in our house, and I have been relieved in thirty days."

"We both always keep a bottle of Dr. Williams' Pink Pills in our house, and I have been relieved in thirty days."

"We both always keep a bottle of Dr. Williams' Pink Pills in our house, and I have been relieved in thirty days."

"We both always keep a bottle of Dr. Williams' Pink Pills in our house, and I have been relieved in thirty days."

Designs On Totem

Poles Are Polynesian Art Of B.C. Indians Similar To That Of South Seas

What strikes one most of all in looking at the arts and crafts of the British Columbia Indians is the general "Polynesian" character of the designs.

The totem poles are obviously related to those of New Zealand, the models of canoes and painted paddles recall the South Seas generally, and in some of the stone carvings there are hints of Easter Island.

On the other hand, the carvings in ivory and horn appear to link on to the early Chinese jades. "If these impressions are just they support the suggestion which has been made of a "Pacific" school of art, antedating the earliest Chinese art we know; and we might venture that whereas partly through Greek and Indian contacts, Chinese art went on developing, the arts and crafts of British Columbia remained more or less in the Pacific phase.

It is said that the Indians of British Columbia differ from those of other parts of Canada and the United States by a definite Mongolian influence.

Further it is known that the Russians were early visitors to British Columbia, and, sure enough, in the carved shaft objects there are distinct affinities with "Scythian" art.

Owing, possibly, to the complete absence of pottery among these Indians, the carvings appear to be the art that developed most consistently, baskets closely woven of cedar bark being used for cooking and for carrying water, and their decoration, generally geometrical, but occasionally representing natural forms—as of the salmon gull, or the bear. The art of weaving, throwing light upon the supposed origin of pottery—out of basket-making, first by dipping the basket with clay, and then by using clay alone, the decorative being transferred from one medium to the other.

(By Betty Barclay)

BOSTON STEAMED BROWN BREAD

1 cup graham flour.
1 cup corn meal.
1/2 cup sugar.
1 teaspoon salt.
1 teaspoon soda.
1 teaspoon baking powder.
1/2 cup sugar or molasses.
2 cups sour milk.

Mix and sift the dry ingredients. Mix milk and molasses and add. When well mixed, fill buttered mold half full. Cover tightly and steam for three hours. Unmold and place in moderate oven for 15 minutes. Serve hot or cold.

FRUIT CREAM CUSTARD

4 oranges.
2 eggs.
1/2 cup sugar.
2 teaspoons flour.
1/2 teaspoon salt.
2 cups milk.
5 tablespoons vanilla.
5 tablespoons sugar.

Beat egg-yolks, add 1/2 cup sugar, flour and salt and mix thoroughly. Add milk and cook in double boiler until thick enough to coat spoon.

Cool, add vanilla and turn into serving dish containing peeled and sliced oranges. Beat egg-whites with 5 tablespoons sugar. Heat on top of custard and serve.

Canadians Delegates For Press Conference

Dominion Will Have Largest Representation At Imperial Meet

Next Year
J. H. Woods, managing editor of the Herald, Calgary, Alta., recently visited London, where he will consult with the council of the Empire Press Union in connection with the Canadian contingent of press delegates to the Imperial Press Conference, being held next year.

Mr. Woods said that Canada will be sending 20 delegates to represent the 60 members of the Union in Canada. This is the largest representation of any part of the Empire.

The last conference was held in Australia in 1925, and was previous to that, in 1920, was held in Canada. The Imperial Press Conference is being held in London, England, in June of next year.

How Names Were Given
Europe is derived from Europa, a Greek mythology a woman who was carried off by Jupiter, who came to her disguised in the form of a white bull and here he to the island of Crete. The Greek word is said to be derived from the Semitic word "Europe" meaning darkness, evening sunset. This is said to derive its meaning from the Semitic word "eu" meaning going forth, or rise of the sun.

A Remarkable Hotel

Built On Swiss Alps and Is 11,480 Feet Above Sea Level

One of the most remarkable hotels in the world is the Jungfraujoch, perched high up on the Jungfrau, of the Bernese Alps, Switzerland, 11,480 feet above the level of the sea. Built of stone and iron, the hotel is welded, as it were, into the sheer rock of the famous mountain. Snows surround it eternally, and, in winter, it is buffeted by the fiercest blizzards of the Alps. But it gives hospitality and warmth to climbers and to the tourists who visit the mountain by the funicular railway from above Interlaken. From the windows of the hotel lounge one often looks out upon a world of clouds, through which some of the high peaks of the Bernese Oberland stand out like rugged islands.

Nearly every member of the hotel staff is an expert mountaineer. For though the funicular runs to within a short distance of the hotel there are often long slips during the winter when the heavy snows prevent all but the most expert guides from reaching civilization is by ski along dangerous mountain tracks.

The Jungfraujoch hotel has its origin in a ramshackle shelter but built by workers when engaged in the construction of the funicular railway. From this dwelling where they ate their simple meals of beer and bread has arisen the hotel that is unique in the world.

The last conference was held in Australia in 1925, and was previous to that, in 1920, was held in Canada. The Imperial Press Conference is being held in London, England, in June of next year.

How Names Were Given
Europe is derived from Europa, a Greek mythology a woman who was carried off by Jupiter, who came to her disguised in the form of a white bull and here he to the island of Crete. The Greek word is said to be derived from the Semitic word "Europe" meaning darkness, evening sunset. This is said to derive its meaning from the Semitic word "eu" meaning going forth, or rise of the sun.

Trail Riding In Rockies
Trail riding is one of the favorite pastimes of the national parks in the Canadian Rockies. This is one of the best ways of seeing all the most of the points of interest. In Banff, trail riding of ten, twenty-five, or thirty miles can be done on horse or on horse trained to the work and altogether trustworthy.

Canadians Delegates For Press Conference

Dominion Will Have Largest Representation At Imperial Meet

Next Year
J. H. Woods, managing editor of the Herald, Calgary, Alta., recently visited London, where he will consult with the council of the Empire Press Union in connection with the Canadian contingent of press delegates to the Imperial Press Conference, being held next year.

Mr. Woods said that Canada will be sending 20 delegates to represent the 60 members of the Union in Canada. This is the largest representation of any part of the Empire.

AMBASSADOR MAKES DECISION

Giant Stick Of Timber Shipped From B.C. To Toronto

A giant stick of timber, from which when converted into a flagpole the Union Jack will next year float at the Canadian National Exhibition, Toronto, was successfully loaded on the Canadian National S.S. "Canadian Ranger," which has taken it to Montreal, whence one of the Canada Steamship Line steamers will convey it to Toronto.

The stick, which is second only in size to that donated a few years ago to New Gardens, London, England, was located on the timber line of the Timberland Lumber Company, or Vancouver Island, and has been donated to the Exhibition as an advertisement of the huge size of British Columbia trees. It will be kept a year to thoroughly season and when trimmed down it will measure 184 feet in length, 34 inches in diameter at the base and 10 inches at the top.

To store such a huge timber required some skill, as the big stick is longer than the open deck space on the vessel. It was, however, loaded without any mishap on top of deckload of lumber on the "Canadian Ranger" at the Burrard Drydock.

The "Canadian Mediterranean"
Montreal Journal Sees Important Future For The I.L.R.

Commenting on the completion of the Hudson Bay Railway, Le Devoir, of Montreal, edited by Mr. Henri Bourassa, expresses the belief that the new line to the Canadian Mediterranean will prove a valuable addition to Canada's transportation system, not only as a development road, but as an export route.

The richness of the country through which the railway passes has already been proved. Le Devoir, however, points out that the pulp and paper, and metallurgical establishments along the road. It applauds also the manner in which the Government is managing the road on the navigability of the Bay, and concludes: "It is improbable that the line will become a serious menace to the St. Lawrence, but it is sure to be useful, and will become so more and more as seamen become familiar with navigation conditions."

Hunts Grizzly In Spring
Hunting grizzly bears in the spring is good sport, according to Walter W. Lang, of Milwaukee, who has returned from the Chase River country out of Mount Robson, B.C., with one grizzly hide and a couple of brown bears to his credit. It is Mr. Lang's fourth year in this part of the Rockies. He was accompanied on his hunt by Richard Lacey, also of Milwaukee.

Large Area Photographed
Thirty-three thousand, eight hundred square miles were covered in Canada during the season of 1928 by oblique aerial photographs taken by the Royal Canadian Air Force for the Topographical Survey, Department of the Interior.

University Of Alberta
The University of Alberta has just celebrated its twenty-first birthday. The first president, Dr. H. M. Fox, now president of the National Research Council of Canada, and the second president of the province, Dr. A. C. Rutherford, participated in the anniversary ceremonies.

Makes For Unemployment
One of the causes of unemployment in Europe is that our working lives have been prolonged, declares a statistician. At one time, he says, "too old at forty" was the cry throughout the world, but we have now found that we are not too old at 60 or 65.
